

RESOURCE PROFILE

Date Send to Client	
Name	KAISAH AMILA BINTI MOHAMED KHANDI
Position Proposed	
Years of Experience	4 Years

EDUCATION
1) Course: Bachelor’s Degree of Science in Statistics University: University of Wisconsin-Madison (UW-Mad) 2) Course: Associate’s Degree of Science, Art and General Studies University: Lane Community College (LCC)

SPECIFIC KNOWLEDGE & SKILLS		
Functional Skill Set	Year of Experience	Industry Experience
- PI System Explorer - PI Vision - Project Management	4	Oil and Gas

PROFESSIONAL HISTORY
1. Company: Consurv Technic (M) Sdn. Bhd. Position/Role: PI System Engineer (Data Analyst) a. Project Title: Predictive Rotating Equipment Analytics (PROTEAN) for PETRONAS Carigali Sdn Bhd (PCSB) Project Duration: Feb 2025 – Mar 2026 Main Duties & Responsibilities: - Determining high priority monitoring parameters for various models of rotating equipment. - Developing PI AF structures and PI Vision dashboards for data visualization and monitoring. - Assigning healthiness alarms for critical parameters across all units, enhancing system reliability and early issue detection. - Translating equipment performance calculation into PI AF analyses to integrate the performance graphs on PI Vision dashboards. b. Project Title: PI ACE Migration for Hengyuan Refining Company Berhad (HRC) Project Duration: Aug 2024 – Mar 2025 Main Duties & Responsibilities: - Gathered existing PI ACE configurations and ensure completeness for migration. - Developed PI AF structures to match the original ACE environment. - Recreated or translated PI ACE calculations into PI AF Analysis Service. - Tested the migrated calculations for accuracy and performance against the original ACE outputs. - During server swinging period, performed routine data quality checking to validate the data flow. c. Project Title: Strategic Acquisition of Remote Data from UPS (STARTUPS) for PETRONAS GTS Project Duration: July 2024 – December 2024 Main Duties & Responsibilities: - Developed PI AF structures and PI Vision dashboards for data visualization and monitoring. - Converted STARTUPS’ Health Index metrics into PI AF analyses to calculate UPS healthiness. - Developed a system that allows users to directly input the scores through PI Vision and use the values in the mentioned PI AF analyses.

PROFESSIONAL HISTORY

1.

Company:

Consurv Technic (M) Sdn. Bhd.

Position/Role:

PI System Engineer (Data Analyst)

d.

Project Title:

Development of Digital Engineering Collaboration Centre (DECC) Dashboard for PRPC (Phase 1.3) for PETRONAS Refining and Petrochemical Corporation (PRPC)

Project Duration:

January 2024 - December 2024

Main Duties & Responsibilities:

•

Managed the Rotating discipline of the project.

•

Developed PI AF structures and PI Vision dashboards for data visualization and monitoring.

•

Assigned healthiness alarms for critical parameters across all units and developing notifications for critical alerts.

•

Translated Heat Rate Formula into PI AF analyses.

e.

Project Title:

Enhancement of GPU Technical Centre (GTC) 2.0 for PETRONAS Gas Berhad (PGB)

Project Duration:

June 2023 - December 2024

Main Duties & Responsibilities:

•

Co-managed the Electrical discipline of the project.

•

Developed a predictive analysis model to forecast end-of-month data, streamlining the creation of monthly reports.

•

Estimated monthly TNB charges and determined the necessary import/export values to optimize cost management.

•

Assigned healthiness alarms for critical parameters across all units, enhancing system reliability and early issue detection.

f.

Project Title:

GPU-DX for C3 C4 for PETRONAS Gas Berhad (PGB)

Project Duration:

October 2023 – December 2023

Main Duties & Responsibilities:

•

Developed PI AF structures and PI Vision dashboards for data visualization and monitoring.

•

Established a system that allow users to input monthly values through PI Vision and storing the data into PI Tags.

g.

Project Title:

Installation of Servers for PI Vision, BA and AF for PETRONAS Floating LNG Ltd (PFLNG)

Project Duration:

September 2023 – February 2024

Main Duties & Responsibilities:

•

Converted reporting worksheets into PI AF structures and analyses, streamlining data management and reporting processes.

•

Developed an analysis model to monitor daily compliance and calculate monthly compliance percentages.

PROFESSIONAL HISTORY

1.

Company:

Consurv Technic (M) Sdn. Bhd.

Position/Role:

PI System Engineer (Data Analyst)
- h.

Project Title:

PCMTBE Electrical Digitalization Works for PETRONAS GTS

Project Duration:

September 2023 – January 2024

Main Duties & Responsibilities:

•

Developed PI AF structures and PI Vision dashboards for data visualization and monitoring.

•

Developed a simplified view for the single line drawing of related feeders and incomers.

•

Translated STARTUPS’ Health Index metrics into PI AF analyses to calculate UPS healthiness.

•

Established a system that allow users to directly input the scores through PI Vision and using the values into mentioned PI AF analyses.

i.

Project Title:

Upstream Real-Time Data (URTD) for PETRONAS ICT Sdn Bhd

Project Duration:

September 2022 – February 2023

Main Duties & Responsibilities:

•

Developed PI AF structures and PI Vision dashboards for data visualization and monitoring.

•

Managed the analyses and mapping of PI Asset Framework for accurate data representation.

•

Managed PI Tags using PI Builder and PI Datalink.

2.

Company:

Consurv Technic (M) Sdn. Bhd.

Position/Role:

Project Engineer (IT)

Main Duties & Responsibilities:

•

Managed procurement processes, including costing analysis and supplier sourcing for IT hardware and software.

•

Executed administrative responsibilities, including responding to clients’ inquiries via emails and phone calls.

3.

Company:

Department of Statistics Malaysia

Position/Role:

Personal MySTEP (Field Officer)

Main Duties & Responsibilities:

•

Gathering census data from respondents in a specific region (Kuantan) through various methods e.g. in-person interviews and phone calls.

•

Monitoring the completion of the census for assigned region and ensuring all required data is collected within the set timeframe.

•

Providing support to respondents who are having issues while completing their census forms.
