

MUHAMMAD AMIRUL ALIFF BIN CHE RAHIM

- Phone Number : +60 18-337 3110
- Email : amirulaliffcherahim@gmail.com
- Address : Selangor, Malaysia
- No. IC : 031031 14 1335

SUMMARY

- Been working since March 2024 and can be described as adaptable and fast-learning Software Engineer with a solid foundation in full-stack development (Next.js, Node.js, Python, SQL) and hands-on experience building internal tools and shipping production-ready apps. Known as a person who gets into project fast and resolve issue quicks. Currently focused on backend engineering while actively exploring a transition into cybersecurity. Looking to specialize in a technical role with room to expand across domains and sharpen deeper skills.

Work Experience

USDP, Petronas

Wilayah Persekutuan Kuala Lumpur, Malaysia

Data Analyst (Contract)

January 2024 - March 2025

- Developed, maintained, and optimized APIs for the AGNES (Augmented Gas Nominating System) project, enabling seamless integration for developers.
- Designed and managed database structures, handled data cleaning, and executed database migrations to ensure data integrity.
- Deployed APIs across staging and production environments, ensuring system reliability and smooth rollouts.
- Acted as team lead: delegated tasks, tracked progress, and supported decision-making on new project requirements.
- Collaborated with backend and frontend developers to align infrastructure and resolve technical challenges.
- Participated in technical and daily meeting as a technical representative of the USDP API team.

Dyna O&M Sdn Bhd

Wilayah Persekutuan Kuala Lumpur, Malaysia

IT Engineer

January 2022 - Present

- Handled procurement workflows including RFQs, purchase orders, invoices, and delivery coordination.
- Provided IT support across hardware, software, and network issues to ensure smooth daily operations.
- Designed, developed, and deployed internal tools and applications to streamline business processes.
- Maintained and improved existing internal projects, ensuring reliability, scalability, and user adoption.
- Acted as both engineer and project owner: gathered requirements, implemented solutions, tested, and deployed to production.
- Collaborated with cross-functional teams and management to align technical solutions with business needs.

Project

AGNES – Augmented Gas Nominating System (Petronas USDP Team)

2024 - 2025

Team Lead & Backend Developer

- Led the USDP team in advancing the AGNES system, a Machine Learning and AI-driven solution to automate the Gas Nomination process.
- Designed and optimized APIs for AGNES developer use, ensuring high performance and scalability.
- Managed database design, data cleaning, and migration to support system reliability and efficiency.
- Oversaw API deployment across staging and production environments.
- Acted as team lead: delegated tasks, tracked progress, and supported decision-making on new initiatives.
- Collaborated with AGNES developers and stakeholders to align backend–frontend infrastructure requirements.
- Represented USDP in technical meetings as a developer and team lead.

Dynaconsurv Portal (Dyna O&M)

2024-2025

Full Stack Developer

- Led end-to-end development of the Dynaconsurv Portal, covering frontend, backend, database, and deployment.
- Coordinated directly with clients to gather requirements, provide updates, and ensure business needs were met.
- Delegated tasks within the team, monitored progress, and guided technical decision-making.
- Designed and implemented new features, handled debugging, and optimized system performance.
- Managed database design, maintenance, and cleanup to ensure long-term reliability.
- Oversaw deployment to production, monitored system stability, and gathered feedback for continuous improvement.
- Participated in testing cycles and ensured smooth handover with documentation and support.

Car Rental System – SDO Resources (Final Year Project, UiTM)

2023

Full Stack Developer

- Developed a website and mobile application for a car rental system.
- Built and tested the database with sample data for system validation.
- Contributed to frontend development: user dashboard, main page, and booking page (with invoice generation).
- Conducted functionality testing, authored user manual, and prepared project documentation.
- Identified and resolved bugs to ensure system stability.

Skills

- **Technical Skills :**
Java, JavaScript, jQuery, Python, Node.js, Express.js, Next.js, HTML, CSS, TailwindCSS, MySQL, MySQL Server, REST API (design, integration, deployment), Figma (UI/UX prototyping), Git/GitHub (version control), Linux/CLI.
- **Language :** Bahasa Malaysia, English.
